 MISS, n. [contracted from *mistress*.] pl. MISSES. A young
 girl; a term of respectful address to an unmarried fe-
 male, prefixed to the name; as, *Miss Smith*, *Miss Olivia*;
 —an unmarried female kept in concubinage; a kept-mis-
 tress. [*Miss*, at the beginning of the last century, was
 appropriated to the daughters of gentlemen under the age
 of ten. *Mistress* was then the style of grown-up unmar-
 ried ladies, though the mother was living; and, for a
 considerable part of the century, maintained its ground
 against the infantine term of *Miss*.]—*Todd*.] See MIS-
 TRESS.
 327 With respect to the use of this title, when two or
 more persons of the same name are spoken of or ad-
 dressed, there is a good deal of diversity. Some give the
 plural form to the name; as, "The *Miss Smiths*;"—others,
 to the title; as, "The *Misses Smith*." In conversation,
 the former prevails; in written or printed composition,
 usage is divided; and in addressing letters, the latter is
 the more common. The following authorities are given
 in favor of the former mode, as used in composition:—
 "The *Miss Cotterels*." *James Northcote*; *James Boswell*.
 "The *Miss Wilkinsons*." *Ed. Malone*. "The *Miss*
Penns." *Richard Rush*. "The *Miss Porters*." *Eclectic*
Review. "The two *Miss Smiths*." *Chambers's Journal*.
 —The following are in favor of the latter form:—"The
Misses More." *Bp. Horne*. "The two *Misses Porter*."
Sir Eg. Brydges. "The *Misses Porter*." *Charles Lamb*.
 "The *Misses Gosset*." *Sir Robert Peel*.—Those gram-
 marians, who treat of the subject, generally favor the
 former mode, (*Miss Smiths*;) though some make an excep-
 tion in addressing letters.—"The *Miss Smiths*;"—much
 preferable to "The *Misses Smith*." *Grant's Grammar*.
 The following remarks are quoted from Dr. Crombie's
 Grammar:—"Two or more substantives in concordance,
 and forming one complex name, or a name and title, have
 the plural termination annexed to the last only; as, '*The*
two Miss Louisa Howards,' '*The two Miss Thomsons*.'
Analogy, Dr. Priestley observes, would plead in favor of
 another construction, and lead us to say, '*The two Misses*
Thomson,' '*The two Misses Louisa Howard*;' for if the
 ellipsis were supplied, we should say, '*The two young*
ladies of the name of Thomson,' and this construction,
 he adds, he has sometimes met with. The latter form
 of expression, it is true, occasionally occurs; but general
 usage, and I am rather inclined to think, analogy like-
 wise, decide in favor of the former; for, with a few ex-
 ceptions, and these not parallel to the examples now given,
 we almost uniformly, in complex names, confine
 the inflection to the last substantive.—We say, indeed,
 '*Messrs. Thomson*;' but we seldom or never say, '*The*
two Messrs. Thomson,' but '*The two Mr. Thomsons*.'
Hiley, in his Grammar, says, "In conversation the
 plural termination is annexed to the last noun only. But
 in composition and addressing letters to individuals of
 the same name, we pluralize the title; as, '*To the Misses*
Howard;' '*To Messrs. Thomson*.' But both in conversa-
 tion and in composition we pluralize only the name of
 married ladies; as, '*Mrs. Wilsons* were there;' '*To Mrs.*
Howards.'"—Thus also Dr. Watts:—"May there not be
Sir Isaac Newtons in every science?—You must not su-
 ppose the world is made up of *Lady Aurora Granvilles*."

NŦ-WĪTH-STĀND'ING,* prep. Without hindrance or obstruction from; not preventing; in spite of. *ŦŦ* In these senses *notwithstanding* has obviously the force of a preposition; yet it is, when thus used, designated by Ash as an adverb, and by the other English lexicographers, it is designated, in all the forms in which it is used, as a conjunction. — Dr. Johnson remarks upon it as follows: "This word, though, in conformity to other writers, called here a conjunction, is properly a participial adjective, as it is compounded of *not* and *withstanding*, and answers exactly to the Latin *non obstante*. It is most properly and analogically used in the ablative case absolute, with a noun; as, 'He is rich notwithstanding his loss.'" — Dr. Webster considers *notwithstanding*, in all cases, as a participle, "constituting, either with or without *this* or *that*, the case absolute or independent." It obviously has the nature of a participle, rather than of a participial adjective. In the above example, "He is rich notwithstanding his loss," *notwithstanding* may be regarded as a preposition governing *loss* in the objective case; or it may be construed as a participle in the case absolute with *loss*.

Mr. Sheridan, Dr. Kenrick, Dr. Ash, Mr. Scott, W. Johnston, and Entick, make the first syllable of this word short, as I have done; and Mr. Perry and Buchanan make it long. In defence of the first pronunciation, it may be observed, that this word is not like *primacy* and *primary*; the first of which is a formative of our own; and the second derived from the Latin *primarius*, which, in our pronunciation of the Latin, does not shorten the *i* in the first syllable, as *privativus* does; and therefore these words are no rule for the pronunciation of this, which, besides the general tendency of the penultimate accent to shorten every vowel it falls on but *u*, seems to have another claim to the short vowel from its termination; thus *sanative*, *donative*, *primitive*, *derivative*, &c., all stand for the short sound. *Walker*.

In the absence of any such related verb, most speakers say prō-nūn-se-ā'shūn, and so avoid the double occurrence of the sound of *sh* in the same word." *Smart.* Walker says, "The very same reasons that oblige us to pronounce *partiality, propitiation, speciality, &c.*, as if written *parshality, prophisheahūn, spesheality, &c.*, oblige us to pronounce *pronunciation* as if written *prōnūnsheashūn*."
 The majority of the authorities above given are in favor of the sound of *sh*; and the Rev. Dr. N. H. Wheaton says, in his "Travels in England," "I was a little mortified at having my Yankee origin detected, by my omitting to give the full sound of *sh* in the word *pronunciation*."

 harmonic relation; symmetry; adaptation of one to an-
 other.—(*Arith.* & *Geom.*) An equality or similarity of ra-
 tio; that is, if the ratio of 6 to 3 be the same as that of
 24 to 12, then 6, 3, 24, and 12, are in proportion, which
 is denoted by placing the quantities thus, 6 : 3 :: 24 : 12,
 and is read, as 6 is to 3, so is 24 to 12. This, because
 three of the numbers are usually given to find a fourth,
 is often called the *Rule of Three*, and divided into *direct*
 and *inverse*. In *direct proportion*, the second term, if
 greater or less than the first, requires the fourth to be,

 above example. In *inverse proportion*, more requires
 less, and less requires more.

[Originally the comp. from *Rath*.] More willingly; preferably to the other; with better reason; in preference; more properly; especially. — To have rather, to desire in preference. 3^d "Dr. Johnson tells us that this word is the comparative of *rath*, a Saxon word signifying *soon*, and that it still retains its original signification; as we may say, 'I would sooner do a thing,' with as much propriety as 'I would rather do it.' Some very respectable speakers pronounce this word with the first syllable like that in *ra-ven*; and Mr. Nares has adopted this pronunciation. Dr. Ash and Bailey seem to be of the same opinion; but all the other orthoëpists, from whom we can certainly know the quantity of the vowel, as Mr. Sheridan, Mr. Elphinstone, Mr. Scott, Dr. Kenrick, W. Johnston, Mr. Perry, Buchanan, and Entick, make it short. There is a pronunciation of this, and some few other words, which may not improperly be called diminutive. Thus, in familiar conversation, when we wish to express very little, we sometimes lengthen the vowel, and pronounce the word as if written *leete*. In the same manner, when *rather* signifies just preferable, we lengthen the first vowel, and pronounce it long and slender, as if written *rayther*; and this, perhaps, may be the reason that the long, slender sound of the vowel has so much obtained; for usage seems to be clearly on the side of the other pronunciation, and analogy requires it, as this word is but the old comparative of the word *rath*, soon." *Walker*.

 “Dr. Johnson, Dr. Ash, Dr. Kenrick, Mr. Barclay, Mr. Nares, Mr. Scott, Mr. Fry, and Entick, accent this word on the second syllable; Mr. Sheridan and Bailey on the last; and Fenning, only, on the first. But, notwithstanding so many authorities are against me, I am much deceived if the analogy of pronunciation be not decidedly in favor of that accentuation which I have given. We have but few instances in the language where we receive a word from the Latin, by dropping a syllable, that we do not remove the accent higher than the original. Thus *recondite*, derived from *reconditus*, may with as much propriety remove the accent from the long penultimate, as *carbuncle* from *carbunculus*, *calumny* from *calumniâ*, *detriment* from *detrimentum*, *innocency* from *innocentia*, *controversy* from *controvertia*, and a thousand others. The word *recondite* must certainly follow the fortunes of the present word; and we find those orthoëpists, who have the word, accent it as they do *recondite*, Mr. Sheridan on the last syllable, but Mr. Fenning, inconsistently, on the second.”

Spenser and Milton place the accent upon the second syllable of this word; and, as Mr. Nares observes, Dr. Johnson has, on the authority of these authors, adopted this accentuation. 'But this,' says Mr. Nares, 'is irregular; for every monosyllabic termination, added to a word accented on the antepenult, throws the accent to the fourth syllable from the end.' With great respect for Mr. Nares's opinion on this subject, I should think a much easier and more general rule might be laid down for all words of this kind, which is, that those words which take the Saxon terminations after them, as *er, less, ness, lessness, by, &c.*, preserve the accent of the radical word; and therefore this and the following words ought to have the same accent as *remedy*, from which they are formed." *Walker*.

"This word seems as nearly balanced between the accent on the first and second syllable as possible; but as it is of the same form and origin as *avenue* and *retinue*, it ought to follow the same fortune. *Retinue* seems to have been long inclining to accent the first syllable, and *avenue* has decidedly done so, since Dr. Watts observed that it was sometimes accented on the second; and, by this retrocession of accent, as it may be called, we may easily foresee that these three words will uniformly yield to the antepenultimate accent, the favorite accent of our language, conformably to the general rule, which accents simples of three syllables upon the first. Dr. Johnson, Mr. Nares, and Bailey, are for the accent on the second syllable; but Dr. Ash, Dr. Kenrick, Buchanan, W. Johnston, Perry, Barclay, Fenning, and Entick, accent the first. Mr. Sheridan gives both, but places the antepenultimate accent first." *Walker.* All the principal English orthoepists, more recent than Walker, give the preference to placing the accent on the first syllable. It may still, however, be reckoned among those words, which, if occasion require, admit of either. It may, perhaps, be necessary to observe, that some lexicographers have written this word *reverie*, instead of *revery*, and that, while it is thus written, we may place the accent either on the first or last syllable; but, if we place the accent on the last of *revery*, and pronounce the *y* like *e*, there arises an irregularity which forbids it; for *y*, with the accent on it, is never so pronounced. Dr. Johnson's orthography, therefore, with *y* in the last syllable, and Mr. Sheridan's accent on the first, seem to be the most correct mode of writing and pronouncing this word." *Walker*.

There is some diversity among our orthoëpists about the *l* in this word and its verb. Mr. Sheridan marks it to be pronounced; Mr. Smith, W. Johnson, and Barclay, make it mute; Mr. Scott and Mr. Perry give it both ways; and Mr. Nares says it is mute in the noun, but sounded in the verb. The mute *l* is certainly countenanced in this word by *calve* and *halve*; but, as they are very irregular, and are the only words where the *l* is silent in this situation, (for *valve, delve, solve, &c.*, have the *l* pronounced,) and as this word is of Latin original, the *l* ought certainly to be preserved in both words; for, to have the same word sound ed differently to signify different things, is a defect in language that ought, as much as possible, to be avoided." *Walker.*

† The old orthography of this word was *scēptic*; and it is so printed in the old dictionaries which preceded those of Dr. Johnson, viz, those of Blount, Phillips, Coles, Kersey, Bailey, Dyche, Ainsworth, Martin, &c.; but Dr. Johnson introduced the orthography of *sceptic*, and in this he has been followed by a majority of succeeding lexicographers, among whom are Ash, Kenrick, Barclay, Fenning, Barlow, Brown, Entick, Scott, Sheridan, Perry, Jones, Jameson, and Richardson; but *sceptic* is preferred by Lemon, Walker, Enfield, Fulton and Knight, Rees, Maunder, Smart, and Reid. In the first edition of Dr. Webster's Large Dictionary, (1828,) the word stands *sceptic*, pronounced *sep'tic*; but, in the second edition, (1841,) it is altered to *sceptic*. In encyclopædias and dictionaries of the arts and sciences, the orthography generally used is *sceptic*.

Walker, in speaking of the orthography and pronunciation of this word, says, "Dr. Johnson has not only given his approbation to the sound of *k*, but has, contrary to general practice, spelt the word *sceptic*. It is not my intention to cross the general current of polite and classical pronunciation, which is, I know, that of sounding the *c* like *k*; my objection is only to writing it with the *k*; and in this I think I am supported by the best authorities since the publication of Johnson's Dictionary."

In a notice of Dr. Johnson's Dictionary, in the Monthly Review, in 1755, soon after its first publication, the following remark is found, in relation to this word: "Sceptic, he insists, ought to be written *sceptic*, but without producing any authority in favor of that mode of spelling." In all the instances, six in number, adduced by Johnson to illustrate the use of the words *sceptic*, *sceptical*, and *scepticism*, the orthography of *sc*, and not *sk*, is used; the same is the fact with respect to all the instances, nine in number, adduced by Richardson in his Dictionary. The orthography of *sceptic*, *sceptical*, *scepticism*, continues to be the prevailing and best usage; so being pronounced hard like *sk* in these words, as in the word *scirrhus*.

† In the pronunciation of this word, we seem to depart both from the Latin *schedula* and the French *schédule*. If we follow the first, we ought to pronounce the word *skēdūle*; if the last, *shēdūle*; but entirely sinking the *ch* in *schedule* seems to be the prevailing mode, and too firmly fixed by custom to be altered in favor of either of its original words. Dr. Kenrick, Mr. Perry, and Buchanan, pronounce it *skēdūle*; but Mr. Elphinston, Mr. Sheridan, Mr. Scott, Mr. Nares, Barclay, Fenning, and Shaw, *shēdūle*; though, if we may believe Dr. Jones, it was introduced *skūle* in Queen Anne's time." *Walker.*

† "The common pronunciation of this word is contrary to every rule for pronouncing words from the learned languages, and ought to be altered. *Ch.* In English words, coming from Greek words with *sch*, ought always to be pronounced like *k*; and I believe the word in question is almost the only exception throughout the language. However strange, therefore, *schizm* may sound, it is the only true and analogical pronunciation; and we might as well pronounce *scheme* *seme*, as *schism* *sizm*, there being exactly the same reason for both. But, when once a false pronunciation is fixed, as this is, it requires some daring spirit to begin the reformation; but, when once begun, as it has (what seldom happens) truth, novelty, and the appearance of Greek erudition, on its side, there is no doubt of its success. Whatever, therefore, may be the fate of its pronunciation, it ought still to retain its spelling. This must be held sacred, or the whole language will be metamorphosed; for the very same rea-

son that induced Dr. Johnson to spell *sceptick* *skeptick*, ought to have made him spell *schism* *stism*, and *schedule* *sedule*. All our orthoëpists pronounce the word as I have marked it." *Walker*.

(Med.)* An induration of a gland, forming an indolent tumor not readily suppurating, and at first unattended by discoloration of the skin.—Sometimes written *schirrus* and *skirrhous*. *Sc*—"This word is sometimes, but improperly, written *schirrus*, with the *h* in the first syllable instead of the last; and Bailey and Fenning have given us two aspirations, and spelt it *schirrus*; both of which modes of spelling the word are contrary to the general analogy of orthography; for, as the word comes from the Greek *σ-κίρρος*, the latter *r*, only, can have the aspiration, as the first of these double letters has always the *spiritus lenis*; and the *c*, in the first syllable, arising from the Greek *κ*, and not the *χ*, no more reason can be given for placing the *h* after it, by spelling it *schirrus*, than there is for spelling *scene*, from *σκηνή, scene*; or *ceptre*, from *σκηπτρον, sceptrum*. The most correct Latin orthography confirms this opinion, by spelling the word in question *scիրrus*; and, according to the most settled analogy of our own language, and the constant method of pronouncing words from the Greek and Latin, the *c* ought to be soft before the *i* in this word, and the first syllable should be pronounced like the first of *sy-inge, Sp-i-us, &c.* Whatever might have been the occasion of the false orthography of this word, its false pronunciation seems fixed beyond recovery." *Walker.*
